

BeoCare BeoHip™ Hip Protector Pants

Two Revolutionary New Hip Protectors

The new BeoCare BeoHip™ range of Hip Protectors combines our proven seamless fixation technology with proprietary energy-absorbing BeoFoam™ technology, to provide superior and affordable protection for the trochanter.

More than 95% of all hip fractures are caused by falls. The majority of hip fractures occur in adults over 65 years old. Fall-related injuries such as hip fractures are associated with increased mortality and a major cause of loss of functional capacity and impaired quality of life. Hip fractures are one of the

largest health concerns in nursing homes as well as an extremely serious threat to the quality of life and the future health of elderly patients. Our BeoHip™ range of Hip Protectors offers distinctive advantages over competing products, through the use of unique materials. Our economical design of the BeoCare BeoHip™ range makes these potentially life-saving devices accessible to many more patients, thereby increasing the quality of care for elderly people worldwide.

BeoCare BeoHip™ UltraLite

- ✚ The most economical Hip Protector on the market with proven results;
- ✚ Sold as a kit with two pairs of fixation pants and one set of removable pads;
- ✚ BeoCare Seamless Fixation pant technology allows for dual purpose use, combining Hip Protector and Incontinence Fixation Pant;
- ✚ Light, breathable polyester/spandex fabric for optimal comfort;
- ✚ Unique BeoFoam™ pads conform to the contour of the body for secure fit (unlike others it requires no body heat).

BeoCare BeoHip™ Premium

- ✚ Nylon/spandex microfiber construction is breathable and helps wick away moisture;
- ✚ Reusable premium pant is washable at 140°F and tumble dryer safe;
- ✚ Sewn-in hip protector pad design guarantees pad is positioned correctly to absorb most of the energy from the fall;
- ✚ Unique BeoFoam™ pads conform to the contour of the body for secure fit (unlike others it requires no body heat).

BeoCare BeoHip™ Hip Protector Pants

BeoHip™ Pads Offer Superior Protection

BeoCare BeoHip™ pants combine BeoCare's proven seamless fixation technology for optimal placement of the pads with our new, proprietary pads made of high resilience BeoFoam. This energy-absorbing foam is made of a low density compressible material that diminishes the force of impact on the trochanter hip bone as result of a fall. Unlike other foams on the market it requires no body heat to conform to the contour of the body.

Independent laboratory tests show that even at low ambient temperatures, our BeoHip pads with proprietary BeoFoam reduce the amount of force transmitted to the hip trochanter bone by 32.8%. This places our pads in the top five best performing pads in a side-by side test performed by an independent research institute(*) comparing the best-selling Hip Protectors on the market.

(*)Based on Laing et al., Journal of Biomechanics (2011) Volume 44, pages 2627–2635, completed with results of recent independent test results of BeoHip pads by S. Robinovitch

About BeoCare

BeoCare Group Inc is the leading US-based manufacturer of seamless post-surgical, orthopedic, maternity and incontinence garments. We work with the largest hospitals in the country to develop advanced medical textile products for use in hospitals and long term care facilities.

Our vision is to become the partner of choice for leading healthcare distributors worldwide and to work together with them in developing innovative, cost effective products that improve the quality of life for patients throughout the world. We invite prospective partners to contact us to explore OEM and private label opportunities.
